

Environmental Policy

Stephenson Group Ltd formulates, manufactures and supplies high performance products designed to meet our customer's specified requirements specifically in the development and manufacture of speciality and process chemicals, including surfactants, antistats, softeners, colour chemicals, technical soaps and toilet soaps.

Stephenson Group Ltd is fully committed to reducing the impact on the environment caused by its activities as well as committed to remaining compliant with all applicable legislation and other voluntary standards which relate to our environmental aspects.

We maintain an environmental management system which considers the nature, scale and environmental impacts of our processes, and are committed to a process of continual improvement and prevention of pollution.

Environmental objectives and targets will be reviewed by the senior management team continually throughout the year these reviews are documented; objectives will be achieved through internal and external audits, review meetings, employee engagement and continuous improvement. . Information regarding these objectives and targets will be communicated on a regular basis.
